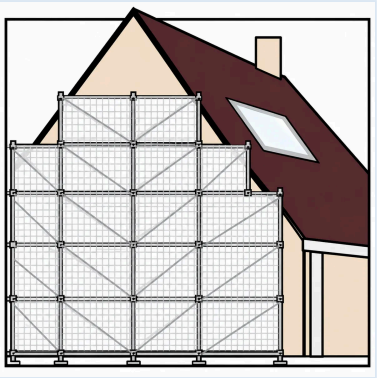
2700

PE scaffold tarp

ECONOMY 110 GR/M²

Woven scaffold wind reduction cloths provide wind protection on construction sites. They reduce wind load by up to 100%, enhancing scaffold stability and safeguarding personnel and materials. Easy to install and compliant with safety standards, they're ideal for construction site protection.



Technical specifications

Tensile strength	857N / 5cm According to ISO 13937-1
Tear strength	187N / 5cm According to ISO 13937-1
Temperature resistance	-40ºC / +80ºC

Product information

- Woven HDPE tape with both sides LDPE coating
- Welded hem with PP reinforcing rope all around
- Double aluminum eyelets, inner ø 12mm, at every 50cm interval
- Each tarpaulin is packed in a crystal clear PE bag with a neutral COVER insert leaflet, 4 languages and EAN code
- Transport packing in sturdy 5-layer water resistant carton boxes
- Delivery on Euro pallets (80×120cm)
- Pallet height: semi approx. 125cm, full approx. 250cm

Customization

- Custom-size, different color and/or weight, minimum order quantity and term of delivery after consultation
- Private label, box or bale packing
- Also available in Flame Retardant (FR) quality
- Product print possibility
- Optional: CORONA surface treatment technology for better adhesion of printed texts
