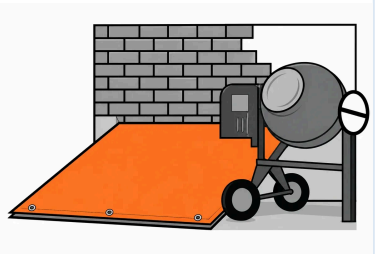
Insulating tarpaulin Standard

STANDARD 250 GR/M²

Insulation tarpaulins with foam provide excellent thermal protection for curing concrete. These specialized tarps create an insulating layer that helps maintain a consistent temperature, allowing the concrete to cure evenly and enhancing its quality and durability.



Product information

- 3-layer composition of two pieces of PE ready made tarpaulin, Economy type, with an insulating middle layer of foam (4mm)
- Product joint all around, stitched using threads and yarns
- Individually folded and rolled and then tied with twine, size labeled
- Delivery on Euro pallets (80 × 120cm)
- Pallet height: approx. 210cm

Customization

- Custom-size: buying quantity and terms delivery in consultation
- Different color and/or weight: buying quantity and terms of delivery in consultation
- Private label or neutral labeling possibility
- Printing of this product is not possible
