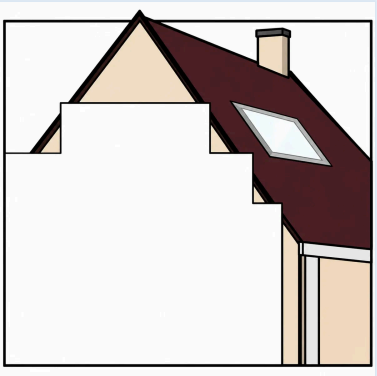
3020FR

PE shrink film FR

EXTRA 300 My

Flame-retardant scaffold shrink wrap is a protective covering for scaffolding on construction sites. It effectively encloses the structure, shielding it from weather elements, dust, and debris, while also offering flame-retardant properties. This durable, transparent film is easily applied using heat, creating a tight, waterproof seal. It enhances safety by reducing fire risk, protects materials, and promotes efficiency in construction projects.



Product information

- 300my
- LDPE film, A1 material
- Biaxial shrinkage 40/60
- 0% UV stabilized
- Each product folded and rolled onto a cardboard core with inner Ø 50mm
- Packed in a sleeve with neutral COVER label, 4 languages and EAN code
