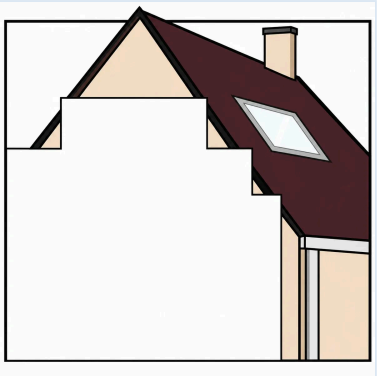
PE shrink film

EXTRA 300 My

Scaffold shrink wrap is a protective covering for scaffolding on construction sites. It effectively encloses the structure, shielding it from weather elements, dust, and debris. This durable, transparent film is easy to apply using heat, creating a tight, weatherproof seal. It enhances safety, protects materials, and promotes efficiency in construction projects.



Product information

- 300my
- LDPE film, A1 raw material
- Biaxial shrinkage 40/60
- 1% UV stabilized
- Each product folded and rolled onto a cardboard core with inner Ø 50mm
