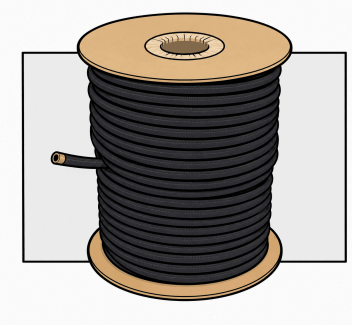
ELASTIC cord on reel

Extremely wear-resistant and UV-resistant elastic cord on a reel with a single Monoflex core and a strong 650 denier PE sheath. Ideal for outdoor applications and industrial use, and easy to thread through eyelets.



This high-quality elastic cord on a reel (trapeze cord) combines extreme wear resistance with excellent UV resistance. Thanks to the single Monoflex core design, the cord is very easy to work with, especially when threading it through tarpaulin eyelets or mounting fittings. Thanks to the 650 denier PE sheath and the addition of anti-UV agents in the rubber core, this elastic cord is the perfect choice for all your outdoor work. This product (W45) offers the very best quality in terms of wear resistance. The 650 denier PE outer sheath provides the strongest protection against wear, guaranteeing a long service life under harsh conditions and making it an extremely suitable product for industry.
