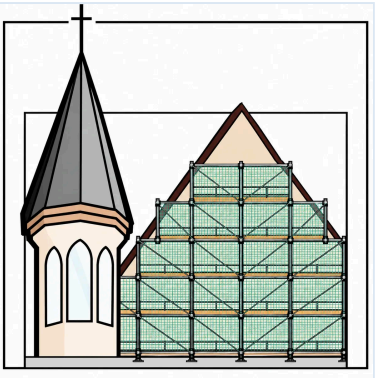
2100

PE debris net

ECONOMY 50 GR/M²

Scaffolding net, vital in construction safety, prevents debris from falling off, shielding workers and pedestrians. Made of HDPE, it withstands weather and enhances productivity. Regular inspection ensures its effectiveness, promoting a secure work environment.



Technical specifications

Tensile strength	215N / 5cm According to ISO 13937-1
Tear strength	47N / 5cm According to ISO 13937-1
UV resistance	200Kly
Temperature resistance	-40ºC / +80ºC

Product information

- HDPE monofilament knitted net
- 2% UV stabilized
- Eyeletband along both long sides (single) and in the centre (double), provided with Ø 12mm button holes at every 3cm interval
- Each net packed in a crystal clear PE bag with a neutral COVER insert leaflet, 4 languages and EAN code
- Transport packing in 5-layer water resistant carton boxes
- Delivery on Euro pallets (80×120cm)
- Pallet height approx. 250cm

Customization

- Custom-size, different color and/or weight, minimum order quantity and terms of delivery after consultation.
- Private label, box or bale packing
- Product print not possible
