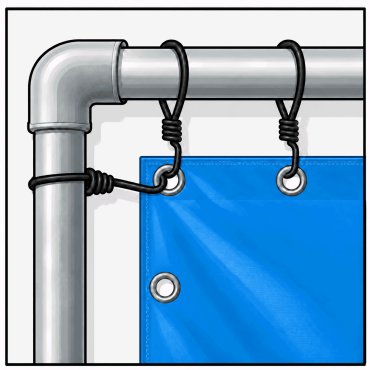
Tensioner + spin hook

A single-hook spiral anchor, commonly referred to as a spin hook, is a practical attachment device primarily used for securing banners. With a sturdy hook on one end, banners can be easily attached to ropes, cords, or other anchoring points. These spin hooks offer a simple and effective solution for hanging advertising banners, event banners, or decorative cloths, both indoors and outdoors.



Sizes

Dimensions (mm) Ø x length	Material	Quantity per bag	Quantity per box
6 × 180	Polyester	25	700
